

Second Quarter Report

2025

Deputy Chief Todd

June 30th, 2025

Quartermaster:

There is not much new to report from the Quartermaster Group for the second quarter. Lt. Haines and FF Monroe continue to wear and evaluate the demo Innotex structural firefighting gear. As of now, no formal feedback has been received from either of them. The evaluation period will continue through the third quarter to determine whether the gear meets our standards for durability, safety, and cost-effectiveness for DTFR.

While Morning Pride remains the preferred gear among the majority of our crews, it is important that we continue to conduct thorough testing and evaluation of all available options. Our commitment to due diligence ensures we are providing our personnel with the best possible protection, performance, and value in the field.

(Annual Swift Water Rescue Training Little Miami)

Fire Equipment:

The newly purchased Drager SCBAs went into service in June. All stations have been outfitted with the necessary tools and equipment to perform basic maintenance, as well as decontamination solutions for use after fire and hazmat incidents. While certified department technicians will continue to handle routine maintenance and address any issues that arise, crews are able to perform minor tasks—such as lubricating regulators and replacing batteries.

The only remaining Drager item we are currently awaiting is the confined space escape bottles. This delay does not impact our operations in any way. Once the bottles arrive, all members will receive the appropriate training to ensure proper use.

The SCBA repair room, along with the fire equipment room, has been fully revamped to improve functionality and efficiency. Both areas have been outfitted with new shelving, better organization systems, and a more structured inventory process. A more reliable backstock of supplies such as Halligan bars, hydrant wrenches, and nozzle parts has been established, ensuring quicker turnaround for repairs and minimizing downtime for some of the basic equipment carried.

These upgrades not only make day-to-day operations smoother for the Fire Repair group, and SCBA technicians, but they also provide station crews easier access to frequently used items. This investment in organization and readiness directly supports the department's commitment to operational excellence and safety.

(Trustee Hedding Live Burns)

Training:

With the rollout of the new SCBAs, some adjustments were necessary to the training calendar during the second quarter. Both the June EMS training and the scheduled Fire training on standpipe operations were converted into company-level drills to allow for greater flexibility and focus on SCBA integration.

To ensure all personnel were fully familiar with the new equipment, Howell Rescue was brought in to conduct a comprehensive overview and address any questions. The following week, an SCBA competency drill was held in the apparatus bay at Station 57, where all department members—except those currently injured or on light duty—successfully completed the training. Those on restricted duty will complete the drill during their first shift back once cleared for full duty.

In addition, live burn training was conducted over three days during the first week of June. SCBA packs and spare bottles were also distributed to all stations to encourage continued hands-on practice, including mask-up drills and basic firefighting tasks. These efforts have ensured a smooth transition to the new SCBA system and reinforced operational readiness across the department.

The second quarter live burn with LSFD and the City of Mason was canceled due to multiple public relations events scheduled on their end. We currently have multi-company drills scheduled with the City of Mason toward the end of July, and our joint training with both LSFD and Mason is planned for September.
